Calomel Salivates Even When Careful

Threacherous Drug can not be Trusted and Next Dosomay Start Trouble

Calomel is dangerous. It may salivate you and make you suffer fearfully from soreness of gums, tenderness of jaws and teeth, swollen tongue, and excessive saliva dribbling from the mouth.

Don't trust calomel. It is mercury; quicksilver.

If you feel bilious, headachy, constipated and all knocked out, just get a bottle of Dodson's Liver Tonic for a few cents which is a harmless vegetable substitute for dangerous calomel.

Take a spoonful and if it doesn't start your liver and straighten you up better and quicker than nasty calomel and without making you sick, you just go back and get your money.

If you take calomel today you'll be sick and nauseated tomorrow; besides, it may salivate you, while if you take Dodson's Liver Tonic you will wake up feeling great. No salts necessary. Give it to the children it is perfectly harmless and can not salivate.

Indigestion

Many persons, otherwise vigorous and healthy, are bothered occasionally with indigestion. The effects of a disordered stomach on the system are dangerous, and prompt treatment of indigestion is important. "The only medicine I have needed has been something to aid digestion and clean the liver," writes Mr. Fred Ashby, a McKinney, Texas, farmer. "My medicine is
